

FULL EXTENSION PNEUMATIC ROLL-OUT SHELVING RACKS

Proper Storage Systems manufactures high capacity full extension pneumatic roll-out shelving to fit your needs and improve material handling. Product features include welded structural steel carriages, adjustable shelves, and a safety interlock system that allows only one shelf to roll out at a time.

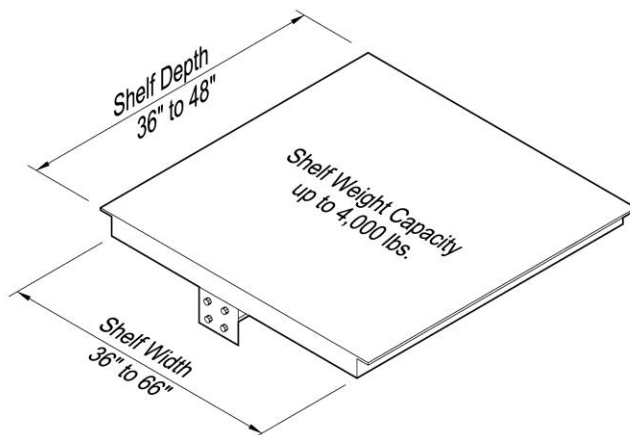

Proper Storage Systems racks are made to customer specification, so you occupy minimal floor space while providing an "exact fit" storage solution for your parts or tools. Provide a list of your part dimensions and floor space available and **Proper Storage Systems** will customize a solution that fits your needs.

Proper Storage Systems racks are extremely heavy duty/built to last racks that are manufactured in Seguin, Texas. The racks are constructed with structural carbon steel and **ship 100% assembled**.

INDUSTRIES SERVED | Injection Molding | Oil & Gas Equipment | Industrial Manufacturing | Aerospace Medical Device Manufacturing | Automotive Manufacturing | Military & Marine
